Since my last, we have had very heavy rains streams were very full. The prospects for crops of corn and tobacco are quite as promising as we could expect for so unusual a season. For the last ten days or two weeks we have had dry, and extremely hot, we then, the thermometer ranging from 85 to 98 degrees.

McKenzie's Mill, Kr., 20th June, 1858.

Messrs. Epitors: As information with regard to the crops of the country is, or ought to be, of interest to all, it may not be uninteresting to some of your readers to know something of the prospects of the crops in the north of Christian prospects of the crops in the north of Christian others ever given by limbs of the profession;

The cas

its welcome yield of the "staff of life;" although seriously injured by the frost in the spring, the crop is fully an average one-in some neighothers it is excellent. The oat crop is ruined by the wet weather—it has the rust universally in the east in this whole country. Such a thing was never known here as rust in oats before. The crop will not be worth harvesting. Wheat has suffered but lintle with rust or seab, but will have some smut in it though. Corn looks very promising. The wet weather has prevented the plowing and clearing of corn properly, and a great many of the farmers complain of being "mightily in the grass;" however, a tew sunny days will remedy that. Tobacco planting is pretty well over; farmers generally have a life have nearly run out, has turned up in Longood stand of tobacco, and the prospect is very good now for a very large croo. There is no telling though what a day may bring forth. Owing to the mild winter, and the abundance of corn, the hog crop will be very fair; there is some scarcity of young hogs, however. Cattle look well, though beef cattle are scarce here. More anon (if desired). Yours, &c.,

TUESDAY......AUGUST 17, 1858. The editor of the Journal is in error. when he says that the Democratic party in Kentucky have made "Lecompton an inexorable touchstone in the nomination of all candidates, of whatever grade, for the public offices." On the contrary, several of those who were candidates in the recent election ln seem to participate in getting up the the city and county agreed with us precisely. But, differing only with President Buchanan upon the question as to whether the Lecomp ton constitution did or did not fairly express the will of the people of that territory, made

SUNDAY LAW .- The ridiculous length to which some of our suburban neighbors, (in Dan vers, for instance, appear to have stretched that stupid statute called the Sunday law, will certainly tempt the next general court to "consider the expediency" of patching and metiding its rotten parts, and giving greater elasticity to what may prove to be sound. The idea of prohibiting a whole community, composed largely of laboring people, from buying a loaf of bread, us. or taking home from the baker's a pot of bcans, on a Sulbath morning, is too preposterous to last long. The same thing was tried in England by Oliver Cromwell's putitans, touching

The New York Times' correspondent, writing from Salt Lake City under date of July 17, gives some very interesting particulars, from

which we extract the following. A CONVERSATION WITH A POLYGAMIST. I spent a night at the residence of Peregrine Sessions—the founder of the settlement—ob-taining an excellent supper at his domicile, and enjoying a delightful uight's rest on a stack of straw in his barnyard, with no roof, save the broad canopy of heaven, studded with its mil. lions of starry brilliants. Mr. Sessions is a native of Maine, who, although seemingly a very intelligent man, embraced Mormonism in its early days, and has followed its varying fortunes, sharing in its sad experiences from that time to the present. He has three wives, all of whom tainment," which a great sign over the doorcap promises to weary travelers. After spending a few hours here, I could not avoid the conction that, however much deceived "Brother Sessions" may be, he is honest in his support of Polygamy, and in taking his three wives, has sacrificed his really good looks, as well as his feelings, to stern convictions of duty; gallantry them no more or no less intense in Democracy, and any application of such a test is simply ab-forbide further disquisition upon that point. He accompanied me out to my extravagant couch, It is true, there were a good many Demo-and so afforded me a capital opportunity to probe him in reference to the "peculiar institution" of Utah. I pressed him to give me an intelligible idea of the foundation of polygamy, inquiring how he and his brethren and sisters

make it a matter of "religion," and why it is was deemed a duty. In response, he favored me

with a highly interesting and somewhat poeti-cal discourse, the pith and marrow of which I ported the Democrat. In supporting the doctrine then, we chimed in with their sectional in the natural sense. God had a wife, who was prejudices; supporting the same doctrine now, it runs counter to them, because of its application or coloring:

| Application or coloring: | Ile said that we were all children of God, in the natural sense. God had a wife, who was our mother, although the Bible said very little about her. God himself was the father of us all, and peopled this world with his own progesitiff. But the question is settled now, and those over hasty friends of ours, who proscribed us because they could, are coming back again

The spirit of every child born to day was born of God and his wife long ago; and we of the present day are, are fathers and mothers only to the bodies of our children—the "talernacles of clay" into which God puts the souls or spirits born of himself as aforesaid. God is only a perfected man; and when we die and go are does his, and if they occasionally go astray it is as possible on earth, so that when he gets into in upholding the great truths of our party in eternity; and "as one star different from another in glory, so shall it be in the resurrection." This, according to Mormon interpretation, simply means that whatever wives are assed to him one and other in glory, so shall it be in the resurrection." This, according to Mormon interpretation, simply means that whatever wives are late and developit "That is our religion,

Taking up his abode in a private boarding house, he was assigned by the landlady to the best room in the house, all her others being filled. The hour for tea having passed, a certain portion of time was spent by our hero in social chat, until his rural hour for bed arrived, when he repaired to his room, which was brilliantly lighted with gas. Not long was he in nnrobing, but to put out his light required rather longer than undressing. At length, under several ineffectual efforts, he succeeded, and snugly ensconced himself under the mosquito net, and dropped quickly away into the arms of Morpheus. quickly away into the arms of Morpheus. IT The Picayune of the same date has the

following:

During the whole of yesterday the investigation into the cause of the explosion of the Virginia was continued. A man clothed insubmarine amor was sent down to examine the boiler and the condition of the wreck. His report has but yet been made.

The whole tenor of the evidence thus far obtained, appears to throw still greater obscurity over the cause of the accident. The particle testifying almost in every particular, concur in their statements. Several are positive there was not more than three or four pounds of steam ou at the nine of the apleadou.

A gentleman obtained, yesetrday, a specimen of what is considered unburned powder, from the flues, and thinks that a considerable quantity of the same material may be found in the same place.

The official report of the luvestization will be furnished the public as soon as the investigation is concluded, which may throw some likht spon that which seems daily togrow a deeper mystery.

Since the explosion of the Virginia the cook has been missing, and the general in pression was that he was blown overboard and perhaps drowned. Yesterday, however, his fate was ascertained, the mangled remains of his bouy having been discovered in the wreck. The top of his skull was cutrely blown off, and one of his legs was broken. An inquest was held on his body by the coroner of Jefferson parish, and a verific was returned to the effect shriply that he came to his death trout the explosion on board of the Virginia. The name of the deceased was liftfiran. He was a native of Fortementh, Ollo, and about 31 years of age.

has the following: The river is still falling at this point. From the officers of the Sam Gaty we learn that the Illinois is falling. Sombart in forms us that the Missouri river is falling fast, and it many places very low. The Sombart grounded severa many places very low. The Sombart grounded several thmes, and met asveral boats aground. At Claysville there is but four and a balf feet water in the channel. The river is very low at Benneit's, mouth of the biage, and the channel was channed thalf a mile from where it was two trips ago. In the channel at that point there is sexua four and a half feet depth of water. The officers of the C. W. THE QUEEN'S MESSAGE!

PRESIDENT'S REPLY Atlantic Cable Working Admirably

Country. UNBOUNDED ENTHUSIASM EVERYWHERE

All Doubts of the Entire Success of the Cable thoroughly Dispelled. New York, Aug. 17.—Information has been received that the Atlantic cable is all right at both ends and throughout, and that the Queen's message has been received, and is now in process of transmission through the length and breadth of our land.

To the Directors of the Atlantic Telegraph Co. egraph Company of Great Britain :

It is understood that the following messag was deposited by Queen Victoria with Mr. Dallas, our Minister to the Court of St. James. a few days since, to be forwarded to the Presi-dent whenever, and as soon as, the cable was reported to be in working order, and this afternoon was transmitted by way of Valentia

lier Majesty desires to congratulate the President upon the successful completion of this great international work, in which the Queen has taken the deepest interest. To which the President replied as follows:

Dated at Washington City, August 16, 1858. BALTIMORE, Aug. 16 .- The New York rail oad companies, persisting in their ruinous reduc tion of the rates to Cincinnati, and the regions more legitimately connected with Bultimore. the Baltimore & Ohio railroad company has recently made a decided retaliatory stroke, by York, Cleveland, Chicago, and the Lake country, to thirty cents per hundred pounds less than by the Erie and New York Central railroads, for first and second class goods. With immense equipment and good condition of the Baltimore & Ohio railroad, aided by its con-nections, this additional trade can readily be acommodated.

The following dispatch in reference to the reception of the Queen's message, was received by the President of the New Orleans and Ohio

Telegraph Company: NEW ORLEANS, Aug. 16, DR. GREEN: Sictransatlantic gloria Monday CHARLES ALLEN.

NEW YORK, Ang. 16 .- Immediately on the announcement of the Queen's message being received over the Atlantic cable, the bells of old Trinity church struck up a merry peal. The public buildings were decorated with flags, and salutes were fired according to previous arrangements. The greatest enthusiasm everywhere prevails at the joyful intelligence of the tele-graphic union of Europe and America.

NASHVILLE, Aug. 16 .- There is tremendous excitement here. Large bodis are parading the streets with music and bonfires. All

in the practical working of the Atlantic Tele-graph cable have had their doubts entirely reoved, and express themselves fully satisfied. Washington, Aug. 16.-The Mayor, this afternoon, sent a message to the City Council recommending that means be taken to cele-

FOSSIL TREES IN A COAL MINE. - The Wilkes barre (Pa.) Record says: On Wednesday last we saw one of the greatest natural curiosities of the coal field, while attending some ladies on a visit to the Baltimore coal mines near the borough. It will be remembered that ten or twelve acres of the mine which had been work-ed fell in a year or two ago, crushing the pillars left for support, and filling that portion with rock and slate from the roof. Through these masses of rock the Superintendent of the mines, Mr. Frederick Landmesser, has explored and discovered the remains of a forest of trees which had been imbeded in the slate rock above the large vein, fragments of which, by the fall, had been detached and now lie in confusion—stumps, roots, limbs, and impressions of bark, in the mine. Among the curiosities are two huge stumps as perfect as if just drawn from the earth by a stumb machine, the roots cut off where they had entered the ground, and the surface looking as if the bark had been taken off while the sap was running. In the rock above can be traced the ends of the logs from which the stumps have fallen, and in one place the body of the tree protrudes, the surface presenting the impression of bark.
